Hi All,

I combined the presentations into one file and it is attached. Take a look at it and make sure the slides are exactly how you want them. Let me know if you want me to make any changes or send changes to me.

The presentation is at the edge of how long we want it to be. There are 56 slides; 44 of these slides are substantive (not a title slide, fish picture, or repeated map). If you go with the minute/slide rule of thumb that puts us where we want to be with about half the time (~ 45 minutes) delegated to the presentation and half for questions. The questions are likely to arrive during presentations so we should be watchful of time as we each progress. I timed myself on a few practice runs and my slides took me ~ 20 minutes. I'll have to talk faster on Wednesday!

Brock has asked one person from each panel to introduce the panel members. I can do this since we've already set it up this way. Pat, Matt, and John, can you send me an email with your title (fish biologist?) and how long you've been working on Delta issues?

Tuesday afternoon, I will convert the Powerpoint file to Adobe PDF. All the notes will go away when I do this. I usually delete out the notes before I convert just to be extra careful.

Thanks everyone for working on this with me. I appreciate all of the time and help you've provided. Have a great long weekend.
Erin
